Introduction

About this guide
This guide helps you to pick the templates you would like to use with your Netpresenter Message Server, Alert Server or App.

If you want a custom design, please contact sales for more information.

How to use the template guide
Browse the template guide to make a selection of the templates you would like to use. Write down the corresponding letters and numbers of each template. See the example below. In this case you would write down the letters Ms (A) and number 2 (B).

Symbols
Templates with advanced features are marked with a symbol:

- Templates that can be customized using color themes
- Templates that are also available in portrait mode
- Templates that support an optional alert sound effect

Example
Ms
Message
Templates

Remember to always wear your ID badge while at work

We know forgetting things is just part of being human, but it’s important you have your badge with you at all times. Not only to identify yourself, but also to punch-in at the beginning of your shift or open employee-only doors.

YOUR LOGO

8:24 AM
The main purpose of Message Templates is to display a message or news item consisting of a title, body text and optionally one or more media objects. Most Message Templates can be flipped horizontally.
The main purpose of Message Templates is to display a message or news item consisting of a title, body text and optionally one or more media objects. Most Message Templates can be flipped horizontally.

**Message with one large media object**

Please be advised that we will be performing a scheduled network maintenance on Thursday, 6 April from 10 until 11 am

NOTICE
All clear
The emergency condition is over. Resume normal activities.
Cybersecurity Templates

Usage
Cybersecurity Templates are optimized to make your employees aware of (new) cyber threats.

1. Cybersecurity awareness

Cybersecurity awareness

2. Cybersecurity awareness

Cybersecurity awareness
Footer sections
The footer of your template is divided into three sections: A, B and C. You can select up to one footer widget for each section.

Footer widgets
- F1: Your Logo
  - Your logo
  - Any image can be placed
- F2: Weather
  - Current weather conditions (C/F)
- F3: Clock 24hr
  - Right, left or center aligned
- F4: Clock 12hr
  - Right, left or center aligned
- F5: Clock & date (12/24hr)
  - Right, left or center aligned
- F6: Ticker
  - Display any RSS feed in a vertically or horizontally scrolling ticker
- F7: Weather, Clock & date (12/24hr)
  - Right, left or center aligned

How it works
You choose 1 widget for each section. Most widgets can fit in all sections but the ticker for instance can only be placed in section B.

* Top or bottom
The ‘footer’ can also be used as a header, which means it is placed at the top of your templates.

Localization
Our widgets are configurable to suit your language and location.
Optional Extras

Most of our templates can be expanded with extra options that bring added functionality to display additional information.

Buttons (PC & Screensaver only)
All items can be adjusted according to your corporate style guide

01 Read more
Hyperlink button
Add a hyperlink to your message and this pre-configured button will be added to your message.

02 Close button
This button will close the player or screensaver when clicked.

Additional content

03 Tuesday, May 16
Publication date
Add the date of publication to your message.

04 Tuesday, May 16 9:24 AM
Publication date & time
Add the date and time of publication to your message.

05 May 17, 2017
Last edited date
Add the date for when your message was last edited.

06 May 17, 2017 8:12 AM
Last edited date & time
Add the date and time for when your message was last edited.
An app template changes the look of your Netpresenter app based on your corporate style guide. The app templates shown are just examples.
App Templates

Usage
An app template changes the look of your Netpresenter app based on your corporate style guide. The app templates shown are just examples.

The Netpresenter app also supports Android and iOS tablets.

Color Theme Templates

Customize all colors
Templates that support Color Themes allow you to change the colors of your template.

Using color themes
You can select, adjust or create a new color theme for your templates. The results are immediately visible through the live preview.

Adding a logo
Add a logo to all your templates at once and/or a logo to each template separately.

Responsive images
To optimize the size of your images the template will scale them automatically according to their aspect ratios.

Watch Color Themes tutorial video
Adaptive Layout
Depending on the added content, Adaptive Layouts will change the layout of the template. For instance: the gallery template can display 1 to 5 images and its layout will change accordingly.

Adaptive Text Field
Adaptive Text Fields scale depending on the amount of content by either increasing or decreasing the font size and/or the field itself.

Alert Server
Alerting software that can quickly send high priority messages to your staff.

Alert Scenario
An alert scenario enables you to quickly select and send a predefined alert message. This preset can contain a message, an image, sound effect and target area.

Color Theme
Color Themes allow you to change the colors of your template.

Media Object
A media object can be an image or a video.

Media Server
The Media Server enables you to automatically extract content from almost any source (SharePoint, Excel, XML/RSS, social media) that otherwise would need manual input.

Message Server
Content management software that enables you to display your messages on PC, TV and mobile devices.

Netpresenter App
Keep your employees informed with company news, intranet headlines and alerts directly on their mobile devices.

Template
A template defines the layout and design of your message or alert. Templates can have a fixed or adaptive layout.
