

# Desktop Alerts

Instantly grab any audience's attention with the use of Netpresenter's Desktop Alerts. Broadcast breaking news – e.g. emergency alerts or important employee updates – to any location at any time. Directly send vital information to your staff in the form of desktop pop-up messages that will appear on top of any other application. With Desktop Alerts your messages will never be missed or not read!

## 100% VISIBILITY

Urgent desktop alerts will appear on top of screensavers and other full-screen applications – guaranteed 100% delivery

## TARGETING

Reach all, regardless of their location or network. Target alert messages to locations, individuals, groups, roles

## URGENT MESSAGING

Share important crisis messages, compliance communication, CEO messages, SharePoint alerts, etc.

## SCHEDULING

Send Desktop Alerts on a scheduled date and time. Plan ahead your activities and announcements

## BE PREPARED

Provide your staff with information and instructions about what to do. This keeps them prepared

# Additional Features

- **Instant Action:** Immediate full display of urgent messages and options to cut through screensavers, locked screens and power saving mode
- **Rich Content:** Add video, Flash, images and HTML content and even live streams to your Windows OS desktop alerts
- **IT Updates:** Schedule and announce IT related updates e.g. server maintenance, downtime or outages
- **Reach Everyone:** Reach all your employees without using email – get your vital news, SharePoint alerts, announcements etc. across within seconds
- **Broadcast Alerts:** With one simple push of a button your whole organization can be notified via all desktops when unexpected events occur
- **Full Control:** An internal messaging and notification system that allows a central administrator to send out desktop alerts
- **Multilingual user interface** enables you to instantly spread emergency messages during stressful events
- **Highly visible alerts** in a format that cannot be ignored – add a flashing red border, alarm or spoken message for extra impact
- **Unstoppable:** Desktop Alerts cannot be blocked or stopped by pop-up killers or users, meaning messages can't be ignored, set aside, or deleted
- **Scalable Solution:** This solution was developed for 24/7 usage, also for large multinationals

## Technical Details

- Thin Client and Windows OS support
- Silent remote updates with auto resume to guarantee uninterrupted playback
- Supports system settings for energy saving
- Designed to run on existing corporate infrastructure
- Low CPU/ network bandwidth usage due to minimal local cache
- Smooth playback with dozens of transitions/wipes
- Presentation scaled to fit screen resolution automatically
- Use of multiple groups and possibility to personalize content
- Auto restart functionality
- Software works on existing network and easy to install (e.g. as MSI package)
- Personalize content via LDAP, Active Directory or IP
- Software uses existing file, FTP or web server
- Security: encryption (HTTPS) and anti-sabotage (hash key)
- Long-distance management and configuration possible
- Intelligent, self-tidying buffer (cache) that ensures your presentation is always active, even when the network connection is disrupted
